

COMPANY PRESENTATION

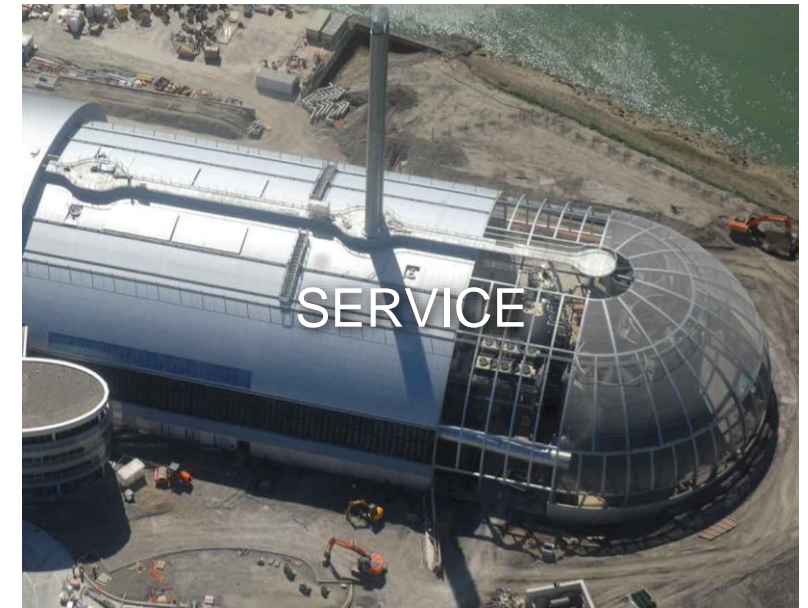

START

COMPANY

Your expert for international engineering and personnel services in large-scale plant construction and in the energy industry as well as for the planning of technical building equipment.

THE COMPANY

Innovative services, reliability and a high level of customer orientation are the cornerstones of Marquard Engineering GmbH & Co. KG. We offer our partners services in the fields of commissioning, planning, health and safety coordination, operating personnel, project planning, installation and construction management at the highest level.

As a medium-sized family business with a tradition of more than 30 years, we see the pillars of our success in the constant expansion of our scope of services and the great willingness to offer innovative and individual services in the field of engineering and personnel services in power plant and plant construction. In addition, we have greatly expanded our expertise in the field of technical building services in recent years and have already successfully implemented numerous projects in this area.

HISTORY

- In 1987 the engineering office was founded as Prisma GmbH.
- In 2001 Prisma GmbH became NV-EnerTech GmbH.
- In 2009 NV-EnerTech GmbH re-located into the new Passive House, supporting the economic efficiency of the company and setting an example for the conscious use of natural resources.
- In 2018 NV-EnerTech expanded the Services Provision into the business Area of Technical Buildings Facilities.
- In 2019 NV-EnerTech Consulting & Engineering GmbH & Co. KG changes the company name to Marquard Engineering GmbH & Co. KG.

POWER PLANT TECHNOLOGIE

Power Plant technologie is one of the central business areas of Marquard Engineering GmbH & Co. KG:

Whether commissioning, planning, design, installation, construction management or in the areas of health and safety coordination and the operating personnel – we have the competence and experience to give you professional support in every phase of your Project!

You can rely on us for all these types of Power Plants:

- Biomass Heating Power Plants
- Hard coal-fired power plant
- Lignite power plant
- Gas and Steam Power Plants
- Heat storage power plant
- Sewage sludge incineration plant
- Waste incineration plant
- Gold sludge incinerator
- Pharmaceutical plant
- Chemical plant
- Petrochemical plant

WHAT WE DO

Our range of services includes innovative and goal-oriented services at the highest level. Our employees are highly trained and experienced in the following areas:

COMMISSIONING

In the commissioning of an industrial plant we are, as in all the sectors set out above, a reliable partner. We know what we are talking about. The many years of experience of our employees, constantly confirmed by the satisfaction of our customers, allow the new or modified plant to be easily put into smooth commercial operation.

During commissioning our employees assure the coordination of the relevant sequences or the entire organisation. This includes the coordination of deadlines and personnel as well as quality management and health & safety.

PLANNING

Our experienced employees take over the planning for the construction and technical building equipment of all projects in the energy industry, pharmaceutical industry, chemical industry and the public sector.

Professionalism, competence and experience are required here. And this is exactly what Marquard Engineering GmbH & Co. KG has been able to offer you for over 30 years!

Our employees are highly qualified, have been trained for the specific requirements of the respective industry and are highly motivated.

HEALTH AND SAFETY COORDINATION

The Health and Safety Coordination is a measure to ensure the safety of construction and projects, taking into account the respective technical conditions.

Our occupational safety specialists take over the planning and coordination of occupational safety for your construction project.

OPERATING PERSONNEL

You need support in power plant technology? We have the right personnel for your project!

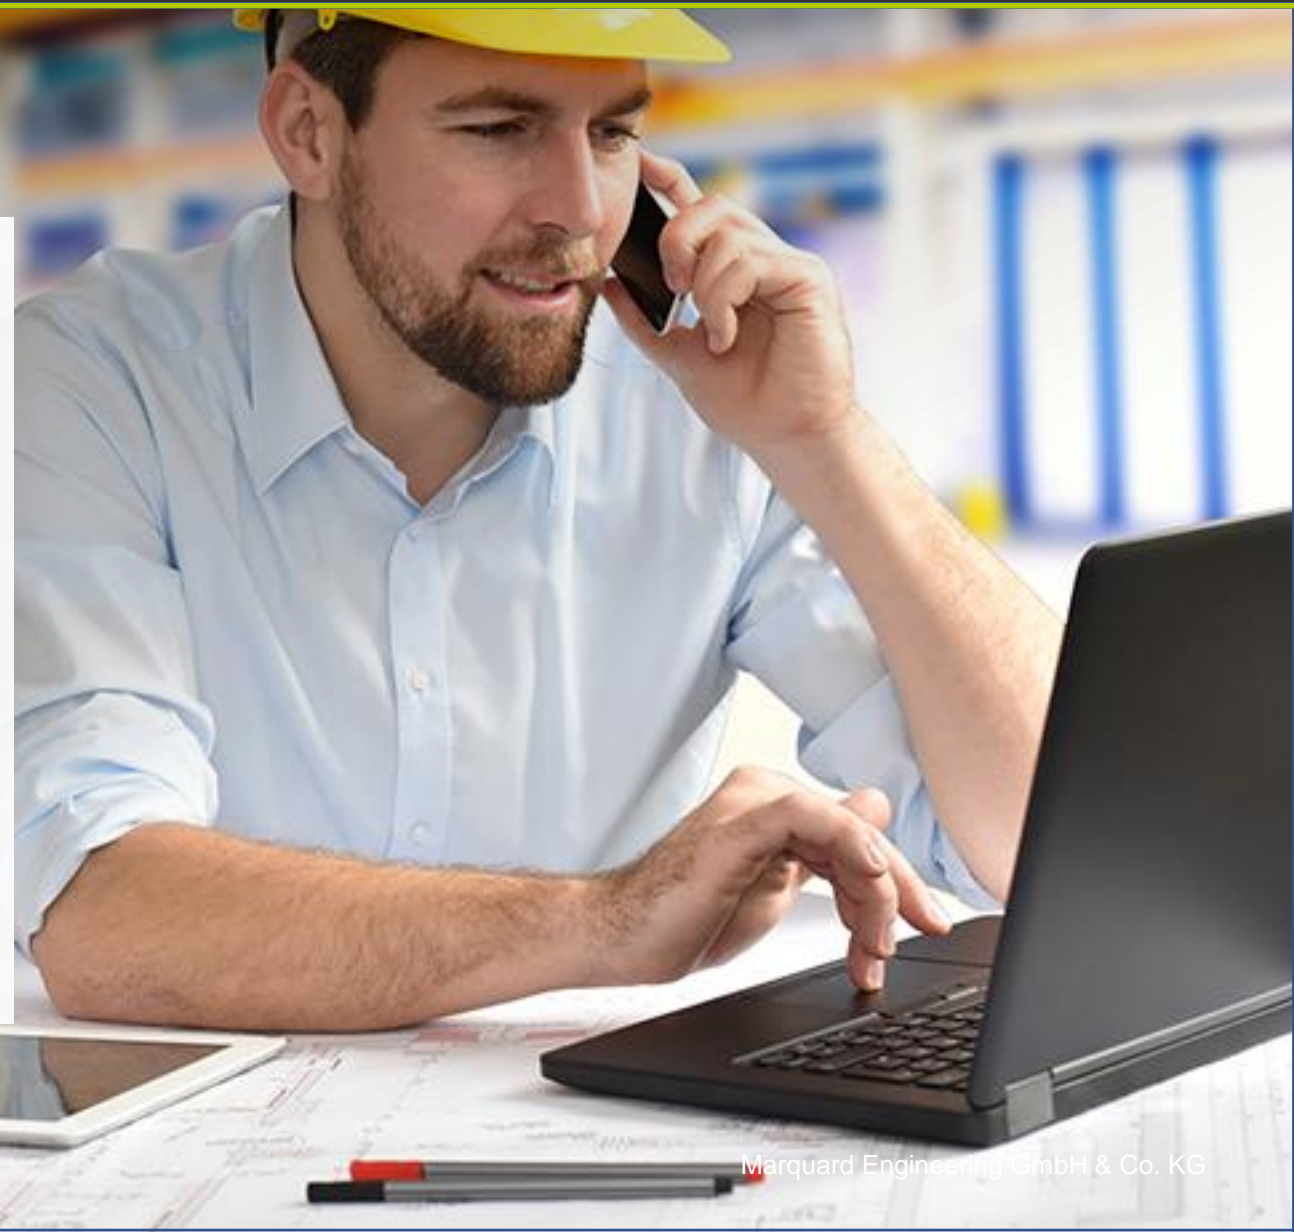

Whether electrical engineers and electrical technicians, power plant operators, power plant engineers and power plant foremen, boiler attendants, safety and security engineers, site managers, mechanical engineers and mechanical technicians or welding engineers, we are happy to provide you with our skilled personnel.

PROJECT DESIGN

The successful implementation of larger projects depends, in addition to comprehensive and competent planning, particularly on precise project planning.

Our experienced employees will support you also in this project area, please contact us!

INSTALLATION

Our experienced staff will take over the supervision of installation in all areas of the power plant for you.

No matter whether in steel construction, in the assembly of mechanical or electrical parts, we implement the assembly flexibly and efficiently for you.

Please contact us, we will be happy to advise you!

SITE MANAGEMENT

Efficiency saves costs and brings economic advantages. Particularly in site management a well-organised infrastructure and well-prepared management on site are essential prerequisites for success.

Specialists ensure that the individual building sectors, including infrastructure, interlock properly and the targets are achieved according to plan.

For power station plants we carry out site management in the fields of electrical, measuring and control engineering, Digital Control Systems, automation and process technology.
